Business Information Systems Online

Master of Science (M.Sc.)

Come closer » www.hs-emden-leer.de/en

Your degree program

The online degree program offers you a comprehensive insight into the areas of business administration, social science and computer science. Both essential fields of competence in Business Information Systems and certain soft skills will form the central focus of your studies. You will learn to master business challenges using information technology and will always receive professional and didactic support from experienced teachers. Within the framework of a Research Project in the third semester, you will test your acquired methodological skills on a topic of your choice before you complete your online studies in the last semester by writing your Master's thesis. Here you can prove that you can independently and purposefully apply the skills you have acquired to practical problems and lead them to success.

Your future career field

The main fields of employment for graduates of this degree programme are diverse. For example, the design and management of processes in the area of organisational development, software development, implementation, system operation and the management of relevant IT projects. Business information systems specialists are also responsible for developing the architectures of modern information systems, for example. Possible industries are: production companies, IT companies for information development, financial service providers, tourism, trade and public administration. Those who aspire to a management position in a company or an institution will be prepared for this task professionally and personally in this degree programme. General specialist knowledge and experience in business information systems are a prerequisite for the programme.

1 st semester	Business Process Management, Human Resource Management, Quantitative Decision Making, Business and IT Law
2 nd semester	ERP and BI with SAP, IT Governance, Management Ethics, Requirements Engineering
3 rd semester	IT Security, Social Media Marketing, Research Project
4 th semester	Master's thesis including Colloquium

Your place of study Emden

Studying in Emden doesn't just mean reading books: We also offer you a wide range of different activities alongside your studies. For example, choose one of our many sports activities, enjoy a cold beer at the next campus party, visit our campus cinema with friends or discover one of the East Frisian Islands on a day trip.
